Amendments:

Please add new claims 37-40 as follows:

- 37. (New) The method of claim 27 wherein the measurement of conversion of a substrate to a product by fructosamine oxidase is conducted on a sample from a human subject.
 - 38. (New) The method of claim 37 wherein the sample is selected from the group consisting of blood, plasma, and serum.
 - 39. (New) The method of claim 37 wherein the human subject is known to be, or suspected of, suffering from diabetes mellitus.
 - 40. (New) The method of claim 39 further comprising determining whether the level of fructosamine oxidase activity in the sample is in a normal range.
